Handsigns

A shinobi who's well versed in chakra should know that there are 3 types of fighting techniques: Ninjutsu, Genjutsu and Taijutsu.

Out of which, most Ninjutsu and Genjutsu require handsigns.

These handsigns allow to focus and gather chakra. The stronger a jutsu is, the harder and longer their handsigns would be

Basic Handsigns

These are the 14 basic handsigns in the game

Ram - This is the handsign that helps focus chakra, it activates the jutsu and if focused for long enough, also restores one's chakra

This is the handsign for the **SHADOW CLONE JUTSU** - Making clones of yourself can confuse the opponent into hitting your clone

The discard handsign de-focuses all the chakra one had gathered to perform a jutsu
